

TECHNICAL PRODUCT INFORMATION

Anti Fluid

Application:

Anti Fluid is a high-quality, acid-free preservation product for all types of electric motors and equipment.

Instructions for use:

- Turn off the power of the device or the electrical component before spraying of the Anti Fluid.
- Spray a thin even layer Anti Fluid on the device or component
- Allow the Anti Fluid to dry, 20 to 30 minutes, before turning on the power of the device or the electrical component.

Special advantages:

- Anti Fluid immediately expels the moisture that may be present and forms a flexible hydrophobic coating. This prevents the penetration of moisture and the formation of corrosion.
- Anti Fluid is safe to use on all metals and almost all plastics (pre-test).

Specifications:

Appearance: Clear liquid
Color: Brown
Odor: Solvent
Density: 0,8 g/ml
Flash point: 44°C
