

CMBB

On-wall box for CM- and CM-Design
loudspeaker range

The CMBB is a back-box for the build-in speakers CM6T, CM6E, CM20T, CM608, CM20DT and CM608D.

Due to the conical shape, the CMBB will perfectly fit and stick into a concrete or brick wall. The CMBB can also be used as an on-wall back-box.

Mounting the CMBB is very easy! First the base is mounted on the wall or ceiling.

Then the back-box can be fitted on the base plate by turning the ring counter-clockwise. The ring can be secured by 3 included screws. Afterwards the loudspeaker can be mounted into the back-box.
