

Resists Fraying When Cut
With Scissors

Increased Braid Density
For Fuller Coverage

High Abrasion Resistance

Temp Range -75°C to
125°C

Melt Temp 230°C

Clean Cut cuts easily and
neatly with regular scissors
and maintains a fray resistant
end during installation.

When scissor cut, the end of
Clean Cut will withstand
heavier handling without
fraying than standard PT.

Scissor Cut For Easy, Fray Resistant Installation In Shop Or Field

By adjusting the physical characteristics of the polyethylene terephthalate filaments, the engineers at Techflex have produced a product with the same specifications of our PT with the unique advantage of being able to cut the material with ordinary scissors and still maintain an extraordinarily fray-resistant end.

FLEXO CLEAN CUT (CC) is ideal for field installers and other situations where access to a hot knife is impossible. CC's fray-resistant properties allows frequent expansion at the cut end without unraveling. When cut with a hot knife, CC produces a virtually frayless end.

Sizes larger than 1 1/2" may be available. Contact an Account Representative for additional information.
