GENERAL INFORMATION

The CLF LEDWash is a truly unique fixture. It can be used for all sorts of wall washing purposes, the extreme flat dimensions makes It the ideal tool for use on catwalks, stages, live performances, decors of TV shows and all sorts of other events.

With the powerful RGBW 4 in 1 chips and the use of the 50 mm reflector a high quality colour mixing is being achieved. The version with dynamic white is able to generate a broad range of white light varying from 2700K to 7200K.

Due to the CLS camlock system the LEDWash can not only be used as a free standing floor fixture but also easily be mounted in a truss. The beam can be rotated almost 180° for a optimized covering of the area.

The CLF LEDWash can be used as a wall washer for heights up to 8-10 meter. The units comestandard with a slightly frosted front plate. Should a even higher light output be required than the front plate can be changed into a clear one that increases the light output by another 12%.

The LEDWash has apart from DMX in/outputs, several stand alone operation modes.
