

Desono™ Ceiling Loudspeaker Accessories Square Grille

Installation Guide

Biamp offers a square grille (GSQ) suitable for the Desono CM ceiling loudspeakers. They are sold in 12-packs and can be installed on the ceiling loudspeaker by substituting the square grille for the grille included with the unit. Please refer to the appropriate Installation and Operation guide for full loudspeaker installation instructions.

Installation

1. Install the loudspeaker per the instructions in the manual and adjust tap settings as necessary. Do not compress the ceiling tile or the grille will not be able to be attached (see [1b] below).
2. If installing on an CM20DTS or CM30DTD, a spacer must be adhered to the inside of the grille to center the loudspeaker. Use the wider one for the CM20DTS, and the narrower one for the CM30DTD. No spacer is needed for use with the CM60DTD. Peel the liner from the spacer, and adhere to the grille. Press around the spacer to ensure full adhesion to the grille.

IMPORTANT: The tether line must be clear of the spacer (not trapped between the spacer and the grille).

NOTE: This grille also can be used on CM1008D, CM608D, CM20DT, CMX20DT Commercial loudspeakers. Use the wider spacer for the CM608D; the others do not need spacers. Assemble per the instructions here.

SPA-GSQ
Square Grille

Model	Fits
SPA-GSQ100	CM20DTS, CM30DTD, CM60DTD

Typical installation (CM30DTD shown)

Installation (continued)

- Attach the grille tether by inserting the tether plug in the hole in the loudspeaker face.
- Position the grille against the loudspeaker face. The rim should fit into the spacer or grill ring. Ensure the grille is in direct contact with the magnets and is fully seated.

SPECIFICATIONS

Material / Finish: Powder-coated perforated steel backed with acoustically transparent color matched cloth. Color is RAL 9016 (white).

Quantity per kit: Sold in 12-packs

Model	Fits	Dimensions mm [in]
SPA-GSQ100	CM20DTS, CM30DTD, CM60DTD	295 x 295 mm [11.6" x 11.6"]
