

SIMPLE JOYSTICK CONTROL KEYBOARD

Vista has released an extremely cost-effective keyboard with 3-axis joystick ideal for lower-end systems where the cost of a joystick keyboard would otherwise have been prohibitive. Offering PTZ control of up to 255 cameras, it allows for control of domes running Vista or Pelco RS485 telemetry. Simple to install with easy set-up menus, the battery operation makes it useful as an engineering set-up and test tool.

The keyboard is simply and intuitively set out and there is an in-built LCD display, making it very easy to use. Password protection ensures that only authorised personnel can use the equipment.
