

MANUAL

OV08

Introduction

Please read this manual before using the product in order to give you the needed product and installation instruction to assure a seamless installation and non compromised overall sound quality.

Thanks for purchasing our APart OVO8 speaker. Budget and quality sound united: welcome the OVO-speakers. This series of cabinet speakers fit into any décor or interior style. The OVO8 is designed specifically for 8Ohm operation. The OVO8 uses a new bracket system that allows a wide range of positioning. In case you want to place your OVO on a flat surface, you can remove the bracket. We have designed a stand incorporated in the foot of the speaker. The sturdy ABS plastic housing guarantees years of trouble free musical enjoyment. Affordable, but by no means a compromise on sound quality – Typically APart!

Safety precaution

- Keep this manual for future reference.
- Take care of your speaker wires, they should be free of damage. Damaged speaker wires might result in poor sound quality and can damage amplifiers.
- Only use accessories specified by the manufacturer
- Make sure the ceiling or wall construction can support the speakers weight.
- Use sufficient amount of speakers to avoid death-spots.
- No main power shall be connected to the loudspeakers, doing so will damage the speaker.
- This apparatus should only be serviced by qualified personnel. If not warranty might be void.
- The speaker grill is fixed, removing it can damage it.
- Use cable of the right gauge, certainly for long runs.

- Use cables with clear color indication and maintain polarity throughout the whole system.
- Avoid loud feedback from microphones, this can damage your speaker.
- Please check the units condition after unpacking. If the outside of the carton box has been damaged, inform your shipper immediately.
- Take notice that the speaker must be protected from direct rain.

Features and benefits

- Inconspicuous Inconspicuous and elegant design
- Remarkable quality sound and extremely affordable.
- 8 inch coated paper woofer and 1 inch silk dome tweeter.
- 160 Watts program power at 8 Ohm
- ABS plastic housing
- Mounting bracket that allows tilting and turning.
- Free stand incorporated in the housing for usage on flat surfaces.
- Quick fit cable clamps for quick and easy mounting.
- Indoor use only
- Can be painted in any RAL color from a minimum of 12 pieces. (ref.: PAINTCAB8)

Connecting the speaker

Use the correct polarity when daisy chaining speakers! When a mistake occurs in your daisy chain, it can severely impact speaker performance as there will be audio-cancellation.

The daisy chain options are endless and the setup will depend on the capabilities of your amplifier. Make sure when daisy chaining speakers that the total impedance is not lower than the lowest specified impedance of your amplifier. Not following this rule might result in distorted sound and might even damage your amplifier.

Series wiring speaker diagram:

$$\text{Total resistance} = R1 + R2 + R3 + R4 + \dots$$

Parallel wiring speaker diagram:

$$\text{Total resistance} = \frac{1}{1/R1 + 1/R2 + 1/R3 + 1/R4 + \dots}$$

R1 = Resistance of speaker 1

R2 = Resistance of speaker 2

R3 = Resistance of speaker 3

R4 = Resistance of speaker 4

100V technology

$$70 \text{ Watt} \geq 20\text{W} + 20\text{W} + 10\text{W} + 5\text{W} + 5\text{W} + 5\text{W} + 2.5\text{W} + 2.5\text{W}$$

Amplifier power must be equal higher than total power of all speakers

Specifications

Woofers	8 inch coated paper
Tweeter	1 inch silk dome tweeter
Shape	cabinet
100 Volt power taps	N/A
Music power RMS	160 W / 8 Ohm
Frequency response	45 Hz to 20 kHz
SPL 1W / 1m	93 dB
SPL 1m / max rated power	115 dB
Dispersion at 1kHz, 4kHz, 8kHz	130°, 90°, 180°
Color	white or black
Cabinet construction	ABS with bass reflex
Grille material	Steel
IP class	40
Fixing type	mounting bracket
Height (mm)	358 mm
Width (mm)	244 mm
Depth (mm)	250 mm
Net weight (pair)	12,2 Kg
Gross weight (pair)	13,6 Kg

Polar diagram 1000 Hz

Polar diagram 4000 Hz

Polar diagram 8000 Hz
